

CHANGE THE SYSTEM NOT THE CLIMATE!

We need a GREEN NEW DEAL

A Zero Carbon Economy = The Path to Full Employment

- A Rapid Transition to Clean Energy through \$100s of billion a year in public investment
- A Carbon Fee to make fossil fuel companies pay for the costs of their carbon emissions
- A Rapid Shut Down of Dirty Energy. Phase out coal, nuclear, oil, and natural gas.
- A Public Energy System. Democratic control leading to end fossil fuel addiction and build clean renewables.

It's time to stop mountaintop removal, deep water and arctic drilling, ban hydrofracking, respect indigenous rights...

and REJECT the Keystone XL Pipeline once and for all!

Join the Green Party –
Powered by people, not corporations.
